Hope Haven Youth Centre is its name.

Founded in a local community hall in 2015, Hope Haven Youth Centre is a modest non-profit organization. It started when a group of volunteers saw that many local kids had nowhere to go safely after school while their parents were still at work. What began as a homework club with roughly 10 children has developed into a comprehensive after-school program that provides over 150 kids with tutoring, meals, and workshops on life skills.

Our mission is to provide every kid in our community with a secure environment, a healthy meal, and the assistance they require to complete their education. Vision: An environment where no child's circumstances cause them to fall behind.

Target audience: Parents and guardians seeking after-school care, prospective sponsors and donors, and interested volunteers.

2. Website Objectives and Goals:

Raising the organization's profile will help more families learn about the program.

Make online donations simple for people.

Use a straightforward sign-up procedure to increase the number of volunteers.

KPIs include the total number of site visitors, the number of volunteer applications filed, and the number of new contributions clicks per month.

3. Analysis of the Current Website (if applicable):

Now, Hope Haven just has a sporadically maintained Facebook page rather than a website.

Weakness: no contact form, no online donation option, and no single location for parents or donors to access trustworthy information.

This demonstrates the obvious requirement for a trustworthy website.

4. Suggested Features and Functionality of the Website:

homepage featuring pictures of the centre and a brief introduction.

The organization's narrative is told on the "About Us" page.

A page outlining the centre's programs.

Get Active webpage for donations and volunteer work.

contact page with a location and form.

5. User Experience and Design:

Warm oranges and greens are used in the colour scheme to create a warm, inviting atmosphere.

Typography: a clean, readable font for body text and a welcoming, rounded sans-serif typeface for headings.

The layout is straightforward and uncomplicated, making it easier for parents and elderly guests to manage.

Before work begins, low-fidelity wireframes will be made to plan the layout.

6. Technical Conditions:

hosting via a low-cost or free supplier that is appropriate for small NGOs.

constructed in accordance with the module specifications using HTML, CSS, and JavaScript.

7. Schedule and Significant Events:

The deadlines for submitting Parts 1, 2, and 3 of the POE will be followed by a reasonable schedule.

8. Budget:

Based on research into regional hosting companies, reasonable estimates were made for hosting, a domain name, and basic upkeep.
